

DILIP SAHOO

ANGULAR DEVELOPER

Bangalore, India | 7077491899 | mailme.dilipsahu4@gmail.com | linkedin.com/in/dilip-sahoo

PROFESSIONAL SUMMARY

Angular Developer with 4+ years of experience in frontend development, specializing in **Angular, TypeScript, JavaScript, RxJS, HTML, CSS, and Angular Material**. Experienced in developing dynamic web applications, reusable components, REST API integrations, file and folder management workflows, and responsive user interfaces. Currently working with **Angular 19** at DigiBoxx, contributing to cloud-based file management features and payment integration. Strong problem-solving and collaboration skills with experience working across frontend and backend application workflows.

TECHNICAL SKILLS

Frontend: Angular 19, TypeScript, JavaScript, HTML5, CSS3, Angular Material

Reactive Programming: RxJS

Backend / Integration: Python, REST APIs

Development: Reusable Components, Directives, Services, Responsive Web Design, API Integration

Payment Integration: Razorpay

Tools: Git, GitLab, SVN, Visual Studio Code, Chrome DevTools, Postman

PROFESSIONAL EXPERIENCE

DigiBoxx Technologies and Digital India Private Limited — Bangalore, India

Software Engineer / Angular Developer | Dec 2025 – Present

- Develop and maintain frontend functionality using **Angular 19, TypeScript, RxJS, and Angular Material**.
- Develop and enhance file and folder management workflows for a cloud-based digital asset platform.
- Improved the **kebab menu** functionality with operations such as **Make a Copy, Delete, Move, and Rename** for files and folders.
- Implemented functionality to **merge files and folders into a single manageable item**, providing a file-organization experience similar to Google Drive.
- Worked on payment integration by replacing **Chargebee** with a direct **Razorpay** integration within the application workflow.
- Collaborate with backend services developed using **Python** and integrate frontend functionality with REST APIs.
- Contribute to improving application usability, data organization, and overall frontend workflows.

ICT Infracon — Bangalore, India

Front End Developer | Jun 2022 – Oct 2025

- Developed and maintained dynamic web applications using **Angular**.
- Designed and implemented reusable **components, directives, and services**.
- Integrated **REST APIs** for frontend-backend communication.
- Collaborated with UI/UX teams to develop responsive and user-friendly interfaces.
- Worked on frontend debugging, application maintenance, and feature development.
- Contributed to application performance optimization and efficient frontend development.

PROJECTS

DigiBoxx — Cloud File & Folder Management Platform

Angular Developer | Angular 19, TypeScript, RxJS, Angular Material, Python, REST APIs, Razorpay

- Developed Angular-based frontend features for file and folder management.
- Enhanced file and folder actions including **Make a Copy, Delete, Move, and Rename** through the kebab menu.
- Implemented file and folder merging functionality to simplify digital asset organization.
- Worked on direct **Razorpay integration** after replacing the existing Chargebee payment workflow.
- Integrated frontend functionality with Python-based backend services and REST APIs.

Coffee Board of India — Seed Supply Management System

Front-End Developer | Angular, RxJS

- Developed the Seed Supply Module using Angular.
- Implemented functionality for order placement, order tracking, and notifications.
- Developed frontend workflows for seed supply operations.
- Improved application performance using **RxJS and lazy loading**.

Primus B School — University Management System

Front-End Developer | Angular

- Developed Student and Teacher Management modules.
- Built LMS functionality for course access, assignments, and tracking.
- Implemented a Fee Management System for academic administration.

SATS — Library Data Collection System

Front-End Developer

- Developed a system for managing book inventory and issue/return operations.
- Implemented barcode scanning for efficient book management.
- Developed automated fine calculation functionality.

EDUCATION

Master of Computer Application — Roland Institute of Technology | Aug 2019 – May 2021

Bachelor of Computer Application — Berhampur University | Jun 2016 – Jul 2019
